Management and Leadership

Environmental Team

As I am a solo practitioner, the firm's environmental team consists only of me. I have been monitoring electric vehicle mileage ranges and purchased one for the firm when the mileage range became feasible for the rural area where I practice.

Annual Environmental Goals

My firm has a goal of replacing all of the windows in the office to be historically accurate but more energy efficient.

Environmentally Preferable Products and Services

The firm purchases recycled paper products whenever available.

Waste

Recycling

Paper, aluminum cans, and plastics are collected and dropped off at a local recycling center. Printer ink cartridges are also recycled.

Energy

Energy Efficiency

A pellet stove was installed to increase energy efficiency in the firm's renovated historic office building.

Renewable Energy

A solar carport has been built to provide electricity for the electric vehicle. The solar carport produces approximately 7 MWH per year. The purchase of gasoline by the firm has been reduced to zero.

Transportation

Employee Commute/Customer Travel

The owner works from home whenever possible to reduce commuter travel.

Efficient Fleet Vehicles

An electric vehicle has been purchased to replace the firm's gas-powered vehicle. This vehicle is saving approximately 296 gallons of fuel annually over the previous gas-powered vehicle.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
